Summary

Aspiring Data Analyst with basic knowledge of SQL, Python, Excel, and Power BI. Skilled in dashboard creation and data analysis through projects, with a strong willingness to learn and grow.

Skills

Programming & Querying: SQL, Python

Data Visualization Tools: MS Excel, Power BI

Projects

Company Sales Dashboard | Power BI

Jan 2026

- Built an interactive sales dashboard using Microsoft Power BI to analyze company sales data.
- Created visualizations such as charts, KPI indicators, and **map-based analysis** to track regional sales performance.
- Used Microsoft Excel for data cleaning and preparation.
- Implemented slicers and filters for dynamic data exploration.

Population of India Dashboard | Data Analysis Project

Feb 2026

- Built an interactive population analysis dashboard using Microsoft Power BI.
- Analysed **state population and geographical area data** to understand regional distribution and density.
- Designed visualizations including **maps, charts, and filters** for state-wise insights.

Education

Matriculation – Jharkhand Academic Council, Ranchi (2022) – 79.09%

12TH - Central Board of Secondary Education, Bangalore (2024) – 60%

B.C.A – Bengaluru City University, Bangalore (Pursuing)
